SSMA

CERTIFIED CODE COMPLIANT

What is it?

SSMA member companies are inspected randomly and un-announced by a 3rd party facility 2 times per year.

What is the Purpose?

To assure the industry that Certified SSMA Members are producing structural steel framing products per code requirements of IBC 2006 and ASTM C955.

What are they inspecting?

1. Steel Quality
    a. Thickness
    b. Yield Strength
    c. Coating Thickness
2. Critical Product Dimensions
    a. Web, Flange, Lip
    b. Flare, Over-bend
3. Member Measurements
    a. Length, Crown, Camber, Bow, Twist
4. Punch-Out Measurements

Whose Standards?

ASTM Requirements

How is Certified Steel Identified?

1. Simply look for the pallet label.
2. Plus each individual member will be embossed with gauge, ksi, SSMA, and Manufacturer ID
